DEVS-ObjC on MinGW Download and Setup

MinGW Download and Installation

→ https://sourceforge.net/projects/mingw/

① Click Download Tab, and execution the mingw-get-setup.exe file.

② Change the installation path to C:\MinGW and click 'Continue'.

③ If the installation is complete, the MinGW Installation Manager window is activated as below.
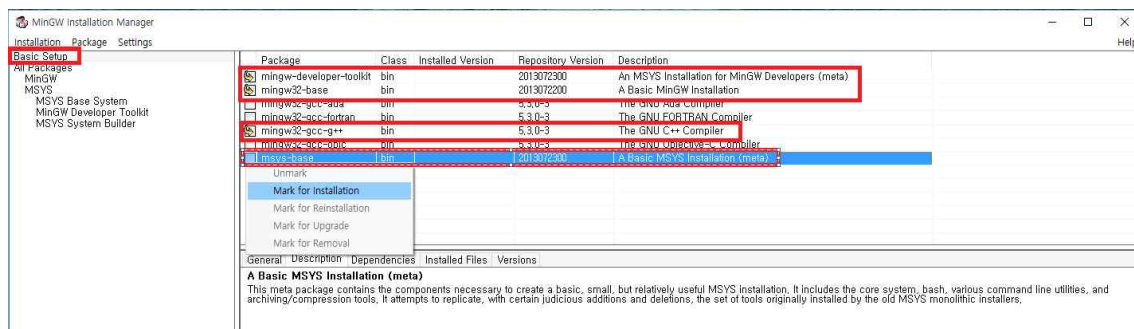

④ After selecting "Basic Setup" in the left tab, click the left check boxes of mingw-developer-toolkit, mingw32-base, mingw32-gcc-g++, and msys-base of the package list in the right tab and select "Mark for Installation". Finally, click "Installation" menu on the top tab and select "Apply Changes".

⑤ If the "Schedule of pending actions" window is activated, click the "Apply" button.
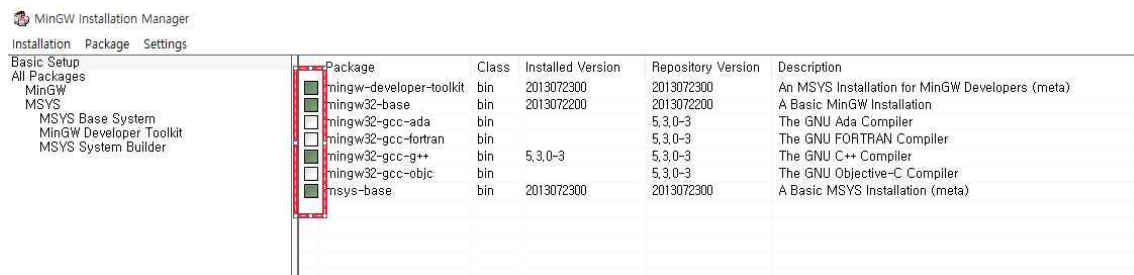

⑥ If the installation was successful, the check box for the installed package has turned changed as above.

⑦ Execute the initialization file in the init folder of the DEVS-ObjC folder. (run as administrator)
